Address: NS\_L 12/4813 St Addis Ababa, Ethiopia

## Background

---

I am a 4<sup>th</sup> year undergraduate student (starting from 2016/17) in Software Engineering at Addis Ababa institute of Technology which is part of Addis Ababa University. I have acquired the major skills that are needed to a Software developer, Web Developer, Mobile Developer, Tester and UI designer.

## Work experience

---

### UCodeGirl

July 18, 2019 — August 4, 2019

Teacher

UCodeGirl provides a wonderful experience for young girls who are interested in technology.

It includes drone programming, VR 360 world creation, Web Programming and other interesting technologies.

I worked as a teacher in this wonderful program.

### Ethioscholars

July 18, 2017 —

Web Admin (Part Time)

I developed and now maintaining ethioscholars (a travel agency website)

### LineAddis

March 9, 2020 —

Web Admin (Part Time)

I developed and now maintaining LineAddis (a money transaction company)

### SupEd PLC.

February 21, 2020 —

Developer

Working as an intern in SupEd (Support Education) to provide a better learning experience for Ethiopian students.

### Kays Technology Solutions.

March 27, 2020 —

Developer

Working as an intern in Kays (located in U.A.E) which focuses on mainly on virtualization and SaaS.

I have also worked nonprofessionally in Highschool and University as a tutor/guide. I also previously worked in some group and solo projects.

# Qualifications

---

I have experience on some of the major programming languages like Java, C#, Kotlin, Dart, Python and C. On web development I have worked on back end development in PHP, Asp.net, Node.js, React-Native, Flutter Spring. While on the front end (which can be considered as my specialty field) HTML, CSS and JS, ReactJs while not forgetting the really helpful tool: Bootstrap. I have used multiple frameworks in my projects like CodeIgnitor, Laravel, MVVM and MVC. I also worked on the ethioscholars.com website in WordPress.

## Education

---

<b>Primary School</b> AB Info Academy	Sept 2004 — June 2012
<b>Highschool</b> AB Info Academy, Lideta Catholic Cathedral School	Sept 2012 — July 2016
<b>University</b> Addis Ababa University, AAiT Bachelor of Science in Software Engineering	Sept 2016 — Present

## Some of the major courses I took

---

### Web Development, I & II

Addis Ababa institue of Technology

I took a total of three web development courses, starting from my freshman year until now(2019). I really enjoyed this course and it became one of my interests. These courses took a deep look starting from basic to complicated and real life web projects.

### Object Oriented Programming, I & II

Addis Ababa institue of Technology

Object Oriented Programming is the standard way of developing Computer and Web based Products. I had a good time taking two courses about this subject, and I showed a great improvement in the second course compared to the first.

### Software Engineering, I & II

Addis Ababa institue of Technology

Software Engineering covered the steps of developing a software. Which includes the test plan, system requirements, system design specification, implementation and testing and validating.

The second course mainly covered the validation and verification step of software.

## Human Computer Interaction

Addis Ababa institute of Technology

This was a very useful course since it highly decides the success rate of a product. Many useful and game changing application were not successful just because their UI/UX was not easy and good enough.

## Data Structures and Algorithms

Addis Ababa institute of Technology

## Mobile Programming, I & II

Addis Ababa institute of Technology

## Operating Systems

Addis Ababa institute of Technology

## System Programming

Addis Ababa institute of Technology

## Database, I & II

Addis Ababa institute of Technology

# Interests

---

My basic interests are

building a beautiful and easy UI, developing programs and Interacting or interviewing people around ideas in a new product that can solve a problem.
